

Omni 3600

A Powerful Portable Payment Solution

This is the reliable wireless terminal you've waited for — one that puts all the power and functionality of VeriFone's industry-leading countertop terminals in the palm of your hand. An "always connected" wireless link combined with powerful hardware features such as a 32-bit processor and built-in, high-speed thermal printer provide unparalleled performance.

The Omni 3600 includes a mag-stripe and smart card reader — in addition to an internal PINpad.

What's more, the ATM-style interface lets clerks virtually train themselves, while also minimizing errors.

The Omni 3600 portable wireless terminal securely supports payments and runs multiple applications such as credit, debit, EBT, gift card, loyalty, and other value-added applications.

Omni 3600

Cut the Wire, Not the Performance

- Powerful 32-bit processor and fast (15 lines per second), quiet thermal printer trim transaction times — from card swipe to printing of receipt.
- Continuous, virtual link with processors eliminates dial-up delays to speed processing.
- Powerful graphics-handling capabilities of both the display and printer enable you to quickly render logos, graphic fonts and character-based languages.
- Long-lasting, removable battery handles up to 150 transactions on a single charge, including printing.
- Optional base for charging your Omni 3600 and a spare battery includes a 14.4-Kbps modem to streamline batch settlement and software downloading, which provides backup for transaction processing if needed.

Get Up and Running in Minutes

- New terminals are ready to go when you are — without the cost and time delays of installing phone lines.
- Integrated thermal printer features “clam shell” loading, which makes paper threading unnecessary and virtually eliminates jams.
- Intuitive, ATM-style interface, large backlit graphical display and extra-large menu prompts enhance usability and readability under all lighting conditions.
- Sleek, lightweight, ergonomic design comfortably fits in the palm of your hand.
- Triple-track mag-stripe card reader, EMV-compliant smart card reader and internal PINpad let you handle the full spectrum of transactions.

Build on the Versatility for Years

- Plenty of memory supports multiple payment and value-added applications securely on a single terminal, and provides plenty of room for growth.
- VeriFone's VeriShield security architecture meets the latest specifications for PIN-entry devices (PED) and prevents execution of unauthorized software on Omni 3600 terminals.
- Supports DES and Triple DES encryption, including 3DES Master/Session and 3DES DUKPT key management.
- Up to three Security Access Modules (SAMs) safeguard data and support multiple smart card schemes.
- Omni 3600 terminals comply with the latest smart card standards worldwide, such as EMV.

The Omni 3600 portable terminal — a complete multi-application payment solution with global EMV-compliant smart card capability — packed with the power, performance, and reliability only VeriFone can deliver.
